Investment objective

To grow the value of your investment over the long term by investing in a UMF providing a diversified portfolio exposure of mostly growth assets.

The UMF aims to provide capital growth over the long term by investing in a portfolio of predominantly growth assets with minimal defensive asset exposure, and to achieve a total return after fees in excess of the UMF's benchmark over a rolling seven-year period.

Investment strategy

The Fund aims to be fully invested, providing a diversified investment exposure.

The UMF generally gains its exposure to a diversified portfolio of investments through a mix of investment managers.

Due to the UMF's high growth nature, it predominantly gains exposure to growth assets such as Australian and international property and shares and alternative – growth. It may also have a small exposure to defensive assets such as cash, fixed interest and alternative – defensive.

The UMF is authorised to utilise approved derivative instruments for risk management purposes subject to the specific restriction that the derivative instruments cannot be used to gear portfolio exposure.

The underlying investment managers of the UMF may utilise strategies for the management of currency exposure. The level of currency hedging used for the UMF will vary from time to time. The UMF has the capacity to change the level and nature of the currency overlay to manage the UMF's currency risk.
